Influence of plies' orientations on the stress distribution in adhesively bonded laminate composite joints subjected to impact loadings

Rachad Hazimeh, Ramzi Othman, Khaled Khalil, Georges Challita

PII: S0263-8223(16)30640-7

DOI: <http://dx.doi.org/10.1016/j.compstruct.2016.05.059>

Reference: COST 7472

To appear in: *Composite Structures*

Received Date: 9 December 2015

Revised Date: 5 May 2016

Accepted Date: 18 May 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Influence of plies' orientations on the stress distribution in adhesively bonded laminate composite joints subjected to impact loadings
