This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Outdoor comparison of rooftop grid-connected photovoltaic technologies in Marrakech (Morocco)

<i>Abstract</i>	2
<i>Keywords</i>	2
<i>Highlights</i>	2
1. Introduction	2
1.1. <i>Frame of the present work</i>	2
1.2. <i>Quick bibliographical overview and novelties of this work</i>	3
1.3. <i>Organisation of the paper</i>	5
2. Technical details and methods	5
2.1. <i>Special features of the site</i>	5
2.2. <i>PV systems nominal specifications</i>	5
2.3. <i>Inverters energy input / output characteristics</i>	7
2.4. <i>Local characteristics of the PV systems</i>	8
2.5. <i>Data collection procedure</i>	8
2.6. <i>STC power used for the calculation of AC PV yields</i>	9
3. Raw data, data processing, final results and comments	9
3.1. <i>Raw data and data collection success rates</i>	9
3.1.1. <i>Evolution of meteorological data</i>	9
3.1.2. <i>Evolution of daily AC photovoltaic yields</i>	10
3.1.3. <i>Data collection success rates</i>	10
3.1.3.1. <i>Data collection net collection success rate</i>	10
3.1.3.2. <i>Statistics of missing or null data</i>	11
3.2. <i>Ulterior data processing</i>	11
3.2.1. <i>Processing of missing or null data for the 3 PV technologies</i>	11
3.2.2. <i>Processing of missing or null data for less than 3 PV technologies</i>	11
3.2.3. <i>Processing of non null potentially erroneous data</i>	11
3.3. <i>Relative daily photovoltaic performance</i>	12
3.3.1. <i>Relative daily AC PV yields and DC performance ratios</i>	12
3.3.2. <i>Conclusions of this Section</i>	15
3.4. <i>Yearly photovoltaic performance</i>	16
3.4.1. <i>Yearly AC PV yields</i>	16
3.4.2. <i>Relative yearly AC PV yields and DC performance ratios</i>	17
3.4.3. <i>Conclusions of this Section</i>	18
4. Summary, conclusions and next steps	18
5. Acknowledgements	19
6. References	19
