rEMpy: a comprehensive software framework for residential energy management

M. Fagiani, M. Severini, M. Valenti, F. Ferracuti, L. Ciabattoni, S. Squartini

PII: S0378-7788(17)33190-0
DOI: [10.1016/j.enbuild.2018.04.023](https://doi.org/10.1016/j.enbuild.2018.04.023)
Reference: ENB 8496

To appear in: *Energy & Buildings*

Received date: 26 September 2017
Revised date: 8 February 2018
Accepted date: 16 April 2018

Please cite this article as: M. Fagiani, M. Severini, M. Valenti, F. Ferracuti, L. Ciabattoni, S. Squartini, rEMpy: a comprehensive software framework for residential energy management, *Energy & Buildings* (2018), doi: [10.1016/j.enbuild.2018.04.023](https://doi.org/10.1016/j.enbuild.2018.04.023)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- An interoperable and open-source residential Energy Management framework is proposed.
- Real-time interaction with thermal modelling software EnergyPlus.
- Modular structure, algorithm-independent system, and easily expandable.
- Easily design microgrid systems with comparative evaluation of different algorithms.
