BIM-embedded life cycle carbon assessment of RC buildings using optimised structural design alternatives

S. Eleftheriadis , P. Duffour , D. Mumovic

PII: S0378-7788(18)30595-4
DOI: [10.1016/j.enbuild.2018.05.042](https://doi.org/10.1016/j.enbuild.2018.05.042)
Reference: ENB 8583

To appear in: *Energy & Buildings*

Received date: 28 February 2018
Revised date: 19 May 2018
Accepted date: 25 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

BIM-embedded life cycle carbon assessment of RC buildings using optimised structural design alternatives
