This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights:

- Techno-economic analysis on ASHP frosting/defrosting operations firstly reported;
- Economic performance of the optimized ASHP unit efficiently improved;
- Total running costs in heating seasons saved as much as 10.33%;
- Total cost saved 3,516.75 CNY, or 4.67%, over 15 years of service life;
- Payback period of initial cost and variation of electricity unit price discussed.
