Study on Accurate Identification of Soil Thermal Properties under Different Experimental Parameters

Zongwei Han , Biao Li , Changming Ma , Honghao Hu ,
Chenguang Bai

PII: S0378-7788(17)33284-X
DOI: [10.1016/j.enbuild.2017.12.067](https://doi.org/10.1016/j.enbuild.2017.12.067)
Reference: ENB 8260

To appear in: *Energy & Buildings*

Received date: 30 September 2017
Revised date: 2 December 2017
Accepted date: 29 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- An accurate 3-D numerical heat transfer model was established and verified by testing.
- The true thermal properties and identified parameters were compared to analyze the error of model.
- The identification error is estimated under the different experimental parameters.
