

## Accepted Manuscript

Title: Seismic design of reinforced concrete frames for minimum embodied CO<sub>2</sub> emissions

Author: Panagiotis E. Mergos

PII: S0378-7788(17)32766-4

DOI: <https://doi.org/10.1016/j.enbuild.2017.12.039>

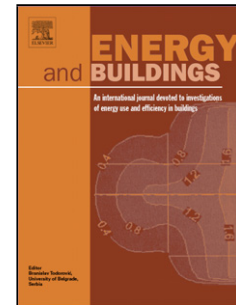

Reference: ENB 8232

To appear in: *ENB*

Received date: 13-8-2017

Revised date: 13-11-2017

Accepted date: 17-12-2017

Please cite this article as: Panagiotis E.Mergos, Seismic design of reinforced concrete frames for minimum embodied CO<sub>2</sub> emissions, Energy and Buildings <https://doi.org/10.1016/j.enbuild.2017.12.039>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# **Seismic design of reinforced concrete frames for minimum embodied CO<sub>2</sub> emissions**
