This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- A categorisation of monitoring evaluation methods to assess performance in use.
- Guidelines for selection and set up of the monitoring approach.
- Evaluation method should be made according to the objective of the evaluation.
- Definition needed of depth and nature of study, audience and resources available.
- Visualisation of relationship between factors for comprehension of methods.
