Modeling of Latent Heat Effects on Phase Transformation in Shape Memory Alloy Thin Structures

K.M. Armattoe, C. Bouby, M. Haboussi, T.Ben Zineb

PII: S0020-7683(16)00086-X
DOI: [10.1016/j.ijsolstr.2016.02.024](https://doi.org/10.1016/j.ijsolstr.2016.02.024)
Reference: SAS 9069

To appear in: *International Journal of Solids and Structures*

Received date: 6 August 2015
Revised date: 13 January 2016
Accepted date: 15 February 2016

Please cite this article as: K.M. Armattoe, C. Bouby, M. This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Effect of latent heat on phase transformation in SMAs
- Finite element simulation of coupling between temperature heterogeneity induced by latent heat and phase transformation distribution in SMA thin structures
- Effect of loading rates on thermo-mechanical behavior of SMAs
- 2D thermo-mechanical continuum finite element with SMA constitutive model implemented in Abaqus finite element code via UEL subroutine
