

# Accepted Manuscript

Computational analysis for a multi-effect distillation (MED) plant driven by solar energy in Chile

David Saldivia, Carlos Rosales, Rodrigo Barraza, Lorena Cornejo

PII: S0960-1481(18)30936-4  
DOI: 10.1016/j.renene.2018.07.139  
Reference: RENE 10413  
To appear in: *Renewable Energy*  
Received Date: 04 May 2018  
Accepted Date: 29 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
