Central composite design (CCD) optimization of phytohormones supplementation for enhanced cyanobacterial biodiesel production

Antonyraj Matharasi Perianaika Anahas, Gangatharan Muralitharan

PII: S0960-1481(18)30776-6

DOI: [10.1016/j.renene.2018.06.110](https://doi.org/10.1016/j.renene.2018.06.110)

Reference: RENE 10266

To appear in: *Renewable Energy*

Received Date: 30 December 2017

Revised Date: 3 April 2018

Accepted Date: 29 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Central composite design (CCD) optimization of phytohormones supplementation for**
2 **enhanced cyanobacterial biodiesel production**
