Computational investigation of air-biogas mixing device for different biogas substitutions and engine load variations

Akash Chandrabhan Chandekar, Biplab Kumar Debnath

PII: S0960-1481(18)30522-6

DOI: [10.1016/j.renene.2018.05.003](https://doi.org/10.1016/j.renene.2018.05.003)

Reference: RENE 10055

To appear in: *Renewable Energy*

Received Date: 27 June 2017

Revised Date: 2 April 2018

Accepted Date: 1 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Computational Investigation of Air-Biogas Mixing Device for Different Biogas Substitutions and Engine Load Variations

Akash Chandrabhan Chandekar

M.Tech Student

Department of Mechanical Engineering
National Institute of Technology Meghalaya
Bijni Complex, Laitumkhrah
