Thermodynamic analysis of a novel supercritical compressed carbon dioxide energy storage system through advanced exergy analysis

Qing He, Hui Liu, Yinping Hao, Yaning Liu, Wenyi Liu

PII: S0960-1481(18)30524-X

DOI: [10.1016/j.renene.2018.05.005](https://doi.org/10.1016/j.renene.2018.05.005)

Reference: RENE 10057

To appear in: *Renewable Energy*

Received Date: 5 December 2017

Revised Date: 27 April 2018

Accepted Date: 2 May 2018

Please cite this article as: He Q, Liu H, Hao Y, Liu Y, Liu W, Thermodynamic analysis of a novel supercritical compressed carbon dioxide energy storage system through advanced exergy analysis, *Renewable Energy* (2018), doi: 10.1016/j.renene.2018.05.005.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Thermodynamic Analysis of a Novel Supercritical Compressed**
2 **Carbon Dioxide Energy Storage System through Advanced**
3 **Exergy Analysis**
