Mitigating the structural vibrations of wind turbines using tuned liquid column damper considering soil-structure interaction

Tadhg Buckley, Phoebe Watson, Paul Cahill, Vesna Jaksic, Vikram Pakrashi

PII: S0960-1481(17)31294-6

DOI: [10.1016/j.renene.2017.12.090](https://doi.org/10.1016/j.renene.2017.12.090)

Reference: RENE 9587

To appear in: *Renewable Energy*

Received Date: 16 September 2016

Revised Date: 20 December 2017

Accepted Date: 26 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Mitigating the Structural Vibrations of Wind Turbines using Tuned Liquid Column Damper Considering Soil-Structure Interaction
