Assessing the energy benefit of using a wind turbine micro-siting model

Leandro Parada, Carlos Herrera, Paulo Flores, Victor Parada

PII: S0960-1481(17)31119-9

DOI: [10.1016/j.renene.2017.11.018](https://doi.org/10.1016/j.renene.2017.11.018)

Reference: RENE 9420

To appear in: *Renewable Energy*

Received Date: 23 February 2017

Revised Date: 6 November 2017

Accepted Date: 8 November 2017

Please cite this article as: Parada L, Herrera C, Flores P, Parada V, Assessing the energy benefit of using a wind turbine micro-siting model, *Renewable Energy* (2017), doi: 10.1016/j.renene.2017.11.018.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Assessing the energy benefit of using a wind turbine micro-siting model
