This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Life Cycle Energy Analysis of a Metro Station Building Envelope through Computer Based Simulation

Highlights

The following section are revised and highlighted in the revised version of the manuscript.

1. Section 3.1. Embodied energy – revised.
2. Section 6. Discussion - revised.

Abstract

This study focuses on the energy auditing of a metro terminal station building envelope which is located at a major city in south India. Embodied energy was calculated using the
