Influence of Clay mineralogy on the relationship of CBR of fine-grained soils with their Index and Engineering properties

H.B. Nagaraj, M.R. Suresh

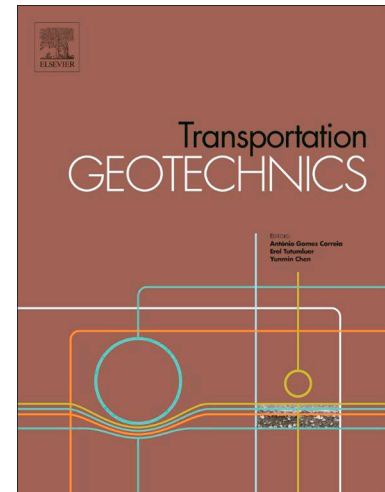

PII: S2214-3912(17)30165-4  
DOI: <https://doi.org/10.1016/j.trgeo.2018.02.004>  
Reference: TRGEO 164

To appear in: *Transportation Geotechnics*

Received Date: 6 September 2017  
Revised Date: 14 December 2017  
Accepted Date: 16 February 2018

Please cite this article as: H.B. Nagaraj, M.R. Suresh, Influence of Clay mineralogy on the relationship of CBR of fine-grained soils with their Index and Engineering properties, *Transportation Geotechnics* (2018), doi: <https://doi.org/10.1016/j.trgeo.2018.02.004>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights for Review:**

1. Clay mineralogy of soil has a significant influence on CBR.
2. Soils have separate CBR correlations with plasticity properties based on clay mineral present.
3. Plastic limit has better correlation with CBR of fine grained soils.
