This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A Plasticity-Based Constitutive Model for the Behavior of Soil- Structure Interfaces under Cyclic Loading

Massoud Hosseinali¹ and Vahab Toufigh²

¹ Ph.D. candidate, Department of Civil Engineering and Environmental Engineering, The University of Utah, Salt Lake City, UT USA;

² Ph.D., PE, Department of Civil Engineering, Sharif University of Technology, Tehran, Iran.

Assistant Professor

P.O. Box 11155-1639, Tehran, Iran

(toufigh@sharif.edu, Corresponding author).
