Torrefaction of Invasive Alien Plants: Influence of heating rate and other conversion parameters on mass yield and higher heating value

Jhonnah Mundike, François-Xavier Collard, Johann F. Görgens

PII: S0960-8524(16)30219-X
DOI: <http://dx.doi.org/10.1016/j.biortech.2016.02.082>
Reference: BITE 16132

To appear in: *Bioresource Technology*

Received Date: 4 December 2015
Revised Date: 17 February 2016
Accepted Date: 18 February 2016

Please cite this article as: Mundike, J., Collard, F-X., Görgens, J.F., Torrefaction of Invasive Alien Plants: Influence of heating rate and other conversion parameters on mass yield and higher heating value, *Bioresource Technology* (2016), doi: <http://dx.doi.org/10.1016/j.biortech.2016.02.082>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Torrefaction of Invasive Alien Plants: Influence of heating rate and other conversion parameters on mass yield and higher heating value

Jhonnah Mundike, François-Xavier Collard*, Johann F. Görgens

Department of Process Engineering, Stellenbosch University, Private bag X1, Matieland 7602, Stellenbosch, South Africa.
