This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Estrogen receptors in the central nervous system and their implication for dopamine-dependent cognition in females

Anne Almey¹, Teresa A Milner^{2,3}, and Wayne G Brake¹

³*Harold and Margaret Milliken Hatch Laboratory of Neuroendocrinology, The Rockefeller University, New York, NY, USA*

ABBREVIATED TITLE: Estrogen receptors and dopamine-dependent cognition

CONTACT INFORMATION:

Anne Almey: Centre for Studies in Behavioral Neurobiology (CSBN), Department of Psychology, Concordia University, Montreal, Quebec, Canada, H4B 1R6. anne.almey@gmail.com, (514) 848-2424 x2201

Wayne Brake (correspondent): Centre for Studies in Behavioral Neurobiology (CSBN), Department of Psychology, Concordia University, Montreal, Canada, H4B 1R6. wayne.brake@concordia.ca, (514) 848-2424 ext. 5451.

Teresa Milner: Feil Family Brain and Mind Research Institute, Weill Cornell Medical College, New York, NY USA. 10065tmlner@med.cornell.edu, (646) 962-8274

KEY WORDS: g protein coupled estrogen receptor 1, estrogen receptor alpha, estrogen receptor beta, dopamine, electron microscopy

GRANT SUPPORT: Supported by a discovery grant from the Natural Sciences and Engineering Research Council (NSERC) of Canada (WGB) and NIH grants DA08259, HL096571, HL098351, AG016765 (TAM). The CSBN is a “groupe de recherche” funded by the *Fonds de Recherche du Québec – Santé*.
