Physiological resonance between mates through calls as possible evidence of empathic processes in songbirds

Emilie C. Perez, Julie E. Elie, Ingrid C.A. Boucaud, Thomas Crouchet, Christophe O. Soulage, Hédi A. Soula, Frédéric E. Theunissen, Clémentine Vignal

PII: S0018-506X(15)30059-3
DOI: doi: [10.1016/j.yhbeh.2015.09.002](https://doi.org/10.1016/j.yhbeh.2015.09.002)
Reference: YHBEH 3957

To appear in: *Hormones and Behavior*

Received date: 8 December 2014
Revised date: 13 September 2015
Accepted date: 18 September 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Physiological resonance between mates through calls as possible evidence of empathic processes in songbirds
