Supplemental material

Clinical guidance

Accepted February 8, 2018.

Dr. Georgiades is with the Offord Centre for Child Studies, McMaster University, Hamilton, Ontario, Canada. Dr. Rudolph is with the School of Public Health, University of California, Berkeley. Drs. Paksarian and Merikangas are with the Genetic Epidemiology Research Branch. This work was supported by the David R. (Dan) Offord Chair in Child Studies, a CHIR New Investigator Award, and the Intramural Research Program of the National Institute of Mental Health (ZIAMH002808). The views and opinions expressed in this article are those of the authors and should not be construed to represent the views of any of the sponsoring organizations, agencies, or U.S. Government. The NCS-A and the larger program of related NCS surveys were supported by the National Institute of Mental Health (UOI-MH60220) and the National Institute on Drug Abuse (ROI DAO 16558) with supplemental support from Substance Abuse and Mental Health Services Administration, the Robert Wood Johnson Foundation (Grant 044708), and the John W. Alden Trust. The NCS-A was carried out in conjunction with the World Health Organization World Mental Health Survey Initiative. The funding organizations had no further role in the study design; collection, analysis, and interpretation of data; writing of the report; and decision to submit the manuscript for publication.

Dr. Rudolph served as the statistical expert for this research.

Disclosure: Drs. Georgiades, Paksarian, Rudolph, and Merikangas report no biomedical financial interests or potential conflicts of interest.
