This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Identifying Clinically Significant Irritability in Early Childhood

RH: Preschool Irritability Thresholds

Jillian Lee Wiggins, PhD, Margaret J. Briggs-Gowan, PhD, Ryne Estabrook, PhD, Melissa A. Brotman, PhD, Daniel S. Pine, MD, Ellen Leibenluft, MD, Lauren S. Wakschlag, PhD
[editorial]

[Supplemental material]

Accepted December 22, 2017

Dr. Wiggins is with San Diego State University and the San Diego State University/University of California, San Diego Joint Doctoral Program in Clinical Psychology. Dr. Briggs-Gowan is with University of Connecticut School of Medicine, Farmington. Drs. Estabrook and Wakschlag are with Feinberg School of Medicine and Institute for Innovations in Developmental Sciences, Northwestern University, Evanston, IL. Dr. Wakschlag is also with the Institute for Policy Research at Northwestern. Drs. Brotman, Pine, and Leibenluft are with the Emotion and Development Branch, National Institute of Mental Health, National Institutes of Health, Rockville, MD.

This study was supported by NIMH R01MH082830, 2U01MH082830, U01MH090301, and 2U01MH082830.

Drs. Wiggins and Estabrook served as the statistical experts for this research.

The authors wish to thank Kimberly McCarthy, BS, of the University of Connecticut Psychiatry Department, for assistance in data management and the families who participated.

Disclosure: Drs. Wiggins, Briggs-Gowan, Estabrook, Brotman, Pine, Leibenluft, and Wakschlag report no biomedical financial interests or potential conflicts of interest.
