This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Adult Associations of Childhood Suicidal Thoughts and Behaviors: A Prospective, Longitudinal Analysis

RH: Adult Outcomes of Childhood Suicide Behavior

William E. Copeland, PhD; David B. Goldston, PhD; E. Jane Costello, PhD

This article is discussed in an editorial by Dr. Robert A. King on page xx.

Supplemental material cited in this article is available online.

Accepted September 7, 2017

Drs. Copeland, Goldston and Costello are with Duke University Medical Center, Durham, NC.

This work was supported by the following NIH grants: DA036523, DA023026, MH104576, DA011301. Dr. Copeland had full access to all the data in the study, performed all statistical analyses, and takes responsibility for the integrity of the data and the accuracy of the data analysis.

The authors would like to thank the participants of the Great Smoky Mountains Study and their families for their longstanding involvement in this study.

Disclosure: Dr. Copeland has received research support from the National Institute of Mental Health and the National Institute on Drug Abuse. Dr. Goldston has received research support from the National Institute of Mental Health, the National Institute on Alcohol Abuse and Alcoholism, the Department of Defense (via subcontract from the Henry Jackson Foundation), the Substance Abuse and Mental Health Services Administration, and the American Foundation for Suicide Prevention. Dr. Costello has received research support from the National Institute of Mental Health and the National Institute on Drug Abuse. She is co-author of the following assessment tools: Child and Adolescent Psychiatric Assessment (CAPA), Young Adult Psychiatric Assessment (YAPA), Child and Adolescent Impact Assessment (CAIA), Child and Adolescent Services Assessment (CASA), and Mood and Feelings Questionnaire (MFQ). No personal income is derived from any of these measurements.
