Accepted September 30, 2015

Dr. Emslie, Dr. Kennard, Ms. Mayes, Ms. Moore, Ms. Jones, Dr. Foxwell, and Ms. King are with the University of Texas Southwestern Medical Center and Children's Health Children's Medical Center, Dallas. Dr. Nakonezny is in the Division of Biostatistics, University of Texas Southwestern Medical Center, Dallas.

Funding for this study was provided by National Institute of Mental Health (NIMH) grant R01MH39188 (Principle Investigators Graham Emslie and Betsy Kennard).

Previous Presentation: Data from this study have been previously presented at the annual meetings of the American Academy of Child and Adolescent Psychiatry (AACAP 2013), the New Clinical Drug Evaluation Unit (NCDEU, 2013), European Society for Child and Adolescent Psychiatry (ESCAP, 2013), and the International Conference on Child and Adolescent Psychopathology (2013).

Previous Publication: Data from the treatment phase of the study have previously been published: Kennard BD, Emslie GJ, Mayes TL, et al. Sequential treatment with fluoxetine and Relapse-Prevention CBT to improve outcomes in pediatric depression. *Am J Psychiatry*. 2014;171:1083-90.

Dr. Nakonezny served as the statistical expert for this research.

The authors are grateful to all of the children and families who participated in this study, and to all of the faculty and staff who worked diligently on this research project. The authors especially thank the study coordinators and research assistants, without whom they could not have successfully completed this project: Shauna Barnes, BA, Krystle Joyner, MS, and Tabatha Melton, BA, all of whom were employed by UT Southwestern Medical Center during their work on the study. The authors also recognize the contributions of their consultants: David Brent, MD (University of Pittsburgh), Greg Clarke, PhD (Kaiser Permanente Research), Michael Frisch, PhD (Baylor University), Robin Jarrett, PhD (UT Southwestern), John Rush, MD (UT Southwestern), and Kevin Stark, PhD (UT Austin).
