An *APOE*-independent *cis*-eSNP on chromosome 19q13.32 influences tau levels and late-onset Alzheimer's disease risk

Shuquan Rao, Mahdi Ghani, Zhiyun Guo, Yuetiva Deming, Kesheng Wang, Rebecca Sims, Canquan Mao, Yao Yao, Carlos Cruchaga, Dietrich A. Stephan, Ekaterina Rogaeva

PII: S0197-4580(17)30424-4

DOI: [10.1016/j.neurobiolaging.2017.12.027](https://doi.org/10.1016/j.neurobiolaging.2017.12.027)

Reference: NBA 10123

To appear in: *Neurobiology of Aging*

Received Date: 24 October 2017

Revised Date: 18 November 2017

Accepted Date: 27 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
