Focused and divided attention in a simulated cocktail-party situation: ERP evidence from younger and older adults

Stephan Getzmann, Edward J. Golob, Edmund Wascher

PII: S0197-4580(16)00177-9

DOI: [10.1016/j.neurobiolaging.2016.02.018](https://doi.org/10.1016/j.neurobiolaging.2016.02.018)

Reference: NBA 9531

To appear in: *Neurobiology of Aging*

Received Date: 7 December 2015

Revised Date: 17 February 2016

Accepted Date: 21 February 2016

Please cite this article as: Getzmann, S., Golob, E.J., Wascher, E., Focused and divided attention in a simulated cocktail-party situation: ERP evidence from younger and older adults, *Neurobiology of Aging* (2016), doi: 10.1016/j.neurobiolaging.2016.02.018.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Focused and divided attention in a simulated cocktail-party situation: ERP evidence
from younger and older adults**
