This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: Enhanced defense against mitochondrial H₂O₂ attenuates age-associated cognition decline

Authors and affiliations:

Liuji Chen¹, Ren Na¹, Qitao Ran^{1,2}

¹Department of Cellular and Structural Biology; University of Texas Health Science Center at San Antonio, ²Geriatrics Research Education and Clinical Center, South Texas Veterans Health Care System, San Antonio, Texas 78229

Running title: Overexpression of Prdx3 improves cognition

Correspondence author:

Qitao Ran, Ph.D.
