This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- Anxiety in schizophrenia is determined by adverse childhood experiences.
- Anxiety in schizophrenia is determined by personal distress.
- Symptom's severity has no significant effect in determining anxiety in schizophrenia.
- Global cognitive efficiency has no significant effect in determining anxiety in schizophrenia.
- Stress can be considered as an independent construct, which needs a specific treatment.
