This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Running head: FIREFIGHTER OCCUPATIONAL STRESS, DISTRESS TOLERANCE, & SUICIDALITY 1

Highlights

- Occupational stress and suicidality are both elevated among firefighters.
- Greater occupational stress is associated with increased suicide risk.
- The effects of occupational stress on suicide risk are attenuated at higher levels of distress tolerance.
