This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Decrease in complex II activity in depressed bipolar patients.
- Increase mitochondrial superoxide, carbonyl and TBARS in depressed bipolar patients.
- Increase mitochondrial superoxide dismutase in depressed bipolar patients.
- Mitochondrial oxidative stress play important roles in the depressive phase of BD.
