This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- There are studies using both structural imaging and functional imaging in suicidal patients.
- There are several structural studies of suicide attempters and non-attempters.
- There are fewer functional studies of suicide ideators versus subjects without ideation.
