

## Accepted Manuscript

Title: Antibody-associated epilepsies: clinical features, evidence for immunotherapies and future research questions

Author: Ochuko D. Bakpa Markus Reuber Sarosh R. Irani

PII: S1059-1311(16)30089-9  
DOI: <http://dx.doi.org/doi:10.1016/j.seizure.2016.07.002>  
Reference: YSEIZ 2755

To appear in: *Seizure*

Received date: 30-12-2015  
Revised date: 5-7-2016  
Accepted date: 8-7-2016

Please cite this article as: Bakpa OD, Reuber M, Irani SR, Antibody-associated epilepsies: clinical features, evidence for immunotherapies and future research questions, *SEIZURE: European Journal of Epilepsy* (2016), <http://dx.doi.org/10.1016/j.seizure.2016.07.002>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- The field of autoimmune epilepsies has increasing relevance to general epileptology
- Established clinical features often associate closely with autoantibody specificities
- The diseases often respond well to early immunotherapies plus rapid escalation
- Randomised controlled trials are eagerly awaited
