This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Differences between men's and women's adoption of smartphones are revealed.
- Data was collected from 1,066 consumers in Jordan and United Arab Emirates.
- Enjoyment, effort expectancy, perceived relative advantage and price are important.
- National IT development and policies are important for empowering women.
