This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- GPA threshold crossing is used as an instrument for admission in an RDD analysis.
- Admission to the first-choice programme increases chances of completing a degree in that subject.
- Admission to any of the ranked programmes has no robust effect on years of education.
- Admission status does not affect earnings 11 years after application.
