Statement of authorship: All authors meet the criteria for authorship. Both of us have approved the final article, and are listed as authors.

Statement of originality: The work is original and has not previously been published elsewhere, and is not in the process of being considered for publishing in another journal.

Statement of importance and/or novelty of the findings:

- Searches on relevant databases as Cinahl and PubMed has revealed that hardly any studies in the last ten years describe nursing students` contribution to rehabilitation of homebound elderly people.
- Nurse students are skilled in making rehabilitation plans and activities with home-dwelling patients.
- Home-based services should make better use of nursing students` expertise in rehabilitation work.
