Acknowledge: The researcher appreciates the authorities of Amin Hospital (affiliated to Isfahan University of Medical Sciences) and all nurses participating in this study..

Funding: This research was supported by Isfahan University of Medical Science (grant number: 396150).

Abstract

Background: Nurses are one of the most influential factors in overcoming the main challenges faced by health systems throughout the world. Every health system should, hence, empower nurses in clinical judgment and decision-making skills.

Objective: This study evaluated the effects of implementing Tanner's reflection method on clinical decision-making of nurses working in an intensive care unit (ICU).

Design: This study used an experimental, pretest, posttest design.

Setting: The setting was the intensive care unit of Amin Hospital Isfahan, Iran).
