This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

VIRTUAL VERSES FACE-TO-FACE CLINICAL SIMULATION IN RELATION TO
STUDENT KNOWLEDGE, ANXIETY, AND SELF-CONFIDENCE IN MATERNAL-
NEWBORN NURSING: A RANDOMIZED CONTROLLED TRIAL

Acknowledgements: A special thank you to Professor Maureen White who provided us with student access to request study participation within her maternal child nursing course and to our co-investigator, Dr. Faith Wight-Moffatt, for her assistance with this study. The authors would also like to thank Laedra and Wolters Kluwer Health from Lippincott for providing the Virtual Clinical Simulation for use within this study, i.e., vSim® for Nursing.

Funding: Thank you to the Centre for Teaching and Learning, Dalhousie University, for financial support for this study. The Centre was not involved in the design, implementation or analysis of the findings.

Conflict of Interest: None to declare
