Moufida Sadok is an assistant professor at the Higher Institute of Technological Studies in Communications in Tunis (Iset'Com), ICT Management department. She holds a Doctoral degree in Management (main area Information Systems Management) from the University Pierre Mendès France in Grenoble, France. Her main areas of research interest include business systems analysis and organizational change.

Rihab Chatta is an assistant professor at the Higher Institute of Technological Studies in Communications in Tunis (Iset'Com), Telecommunications department and a permanent member of Green and Smart Communication Systems Laboratory at the Engineering School of Communication of Tunis. His research interests focus on the quantum circuits and quantum computing, modeling of quantum dots, single photon sources and photonic crystal devices. He has more than 10 years experience of teaching in the area of optical communication. He has participated in several research projects related to the development of optics and he has a number of publications in this area.

Peter Bednar is leading the Systems and Information Systems Research Group within the School of Computing at the University of Portsmouth, UK. He is affiliated with the Department of Informatics at Lund University, Sweden. He is originally an Engineer with more than ten years of industrial experience. He is an active researcher for many years, often adopting pragmatic and critically-informed, hermeneutic and systemic approaches. His interests include Contextual Inquiry; Systemic Analysis and Evaluation; Organizational change facilitation, Human Activity Systems and Change Benefit Management.
