

Accepted Manuscript

A preliminary cognitive model for the prediction of energy-relevant human interaction with buildings

Ing. Jörn von Grabe

PII: S1389-0417(17)30116-X
DOI: <https://doi.org/10.1016/j.cogsys.2017.11.005>
Reference: COGSYS 591

To appear in: *Cognitive Systems Research*

Received Date: 13 April 2017
Revised Date: 6 November 2017
Accepted Date: 20 November 2017

Please cite this article as: Jörn von Grabe, Ing., A preliminary cognitive model for the prediction of energy-relevant human interaction with buildings, *Cognitive Systems Research* (2017), doi: <https://doi.org/10.1016/j.cogsys.2017.11.005>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A preliminary cognitive model for the prediction of energy-relevant human interaction with buildings
