Evolutionary Learning Algorithm for Reliable Facility Location Under Disruption

Badr Afify, Sujoy Ray, Andrei Soeanu, Anjali Awasthi, Mourad Debbabi, Mohamad Allouche

PII: S0957-4174(18)30470-6
DOI: [10.1016/j.eswa.2018.07.045](https://doi.org/10.1016/j.eswa.2018.07.045)
Reference: ESWA 12099

To appear in: *Expert Systems With Applications*

Received date: 31 December 2017
Revised date: 13 June 2018
Accepted date: 20 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Investigation of two reliable facility location problems under disruption.
- Elaboration of an evolutionary learning based solution generation approach.
- Application of the approach over an illustrative example and benchmark datasets.
- Comparative analysis and benefit assessment against previously obtained results.
- Sensitivity analysis on demand priority and different distance calculation methods.
