This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

A new sorting method based on VIKOR is proposed.

The proposed method is employed to evaluate the suppliers' environmental performance.

The results proved the efficiency of the proposed method.

The method has a great potential to be applied in different domains.
