Evidence reasoning for temporal uncertain information based on relative reliability evaluation

Cheng-li Fan , Yafei Song , Lei Lei , Xiaodan Wang , Shi Bai

PII: S0957-4174(18)30397-X
DOI: [10.1016/j.eswa.2018.06.048](https://doi.org/10.1016/j.eswa.2018.06.048)
Reference: ESWA 12042

To appear in: *Expert Systems With Applications*

Received date: 19 September 2017
Revised date: 22 June 2018
Accepted date: 23 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Relative reliability factor of temporal evidence source is defined.
- ERE-IFMCDM method is applied to evaluate the reliability factor of temporal BPA.
- Composite reliability of temporal BPA is constructed.
- Temporal evidence combination based on composite reliability is put forward.
