This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A free dataset of more than 25000 tagged RFID readings;
- A review of classic classifiers or indoor tracking with passive RFID;
- Filters to stabilise RFID readings and reduce the impact of outliers;
- A novel tracking method using passive RFID and random forests to track objects.
