Accepted Manuscript

User Action and Facial Expression Recognition for Error Detection System in an Ambient Assisted Environment

Yacine Yaddaden, Mehdi Adda, Abdenour Bouzouane, Sebastien Gaboury, Bruno Bouchard

PII: S0957-4174(18)30380-4 DOI: 10.1016/j.eswa.2018.06.033

Reference: ESWA 12027

To appear in: Expert Systems With Applications

Received date: 27 January 2018 Revised date: 1 May 2018 Accepted date: 14 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- A new method for abnormal behaviors detection using facial expressions is proposed,
- Optimized Convolutional Neural Network is proposed for facial expression recognition,
- A new method for user actions recognition using Radio Frequency IDentification tags,
- Obtained results on several benchmark datasets attest of our system's efficiency,
- Conducted experiments in a testing smart home reveal the effectiveness of our system.
