Retinal Vessel Segmentation based on Fully Convolutional Neural Networks

Américo Filipe Moreira Oliveira, Sérgio Rafael Mano Pereira,
Carlos Alberto Batista Silva

PII: S0957-4174(18)30381-6
DOI: [10.1016/j.eswa.2018.06.034](https://doi.org/10.1016/j.eswa.2018.06.034)
Reference: ESWA 12028

To appear in: *Expert Systems With Applications*

Received date: 10 January 2018
Revised date: 16 May 2018
Accepted date: 14 June 2018

Please cite this article as: Américo Filipe Moreira Oliveira, Sérgio Rafael Mano Pereira, Carlos Alberto Batista Silva, Retinal Vessel Segmentation based on Fully Convolutional Neural Networks, *Expert Systems With Applications* (2018), doi: [10.1016/j.eswa.2018.06.034](https://doi.org/10.1016/j.eswa.2018.06.034)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A multi-scale Fully Convolutional Neural Network for retinal vessel segmentation;
- Rotations as the basis of a joint strategy for data augmentation and prediction;
- The Stationary Wavelet Transform as a way to stack new channels into the input.
