Investigating the Impact of Selection Criteria in Dynamic Ensemble Selection Methods

Jose Augusto S. Lustosa Filho, Anne M.P. Canuto,  
Regivan Hugo Nunes Santiago

PII: S0957-4174(18)30226-4  
DOI: [10.1016/j.eswa.2018.04.002](https://doi.org/10.1016/j.eswa.2018.04.002)  
Reference: ESWA 11916

To appear in: *Expert Systems With Applications*

Received date: 19 December 2017  
Revised date: 22 February 2018  
Accepted date: 2 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- Present three dynamic ensemble selection (DES) methods
- Evaluate the impact of proximity measures in DES methods
- Perform an empirical analysis with one-step and two-step DES methods
- Obtain the best results of the empirical analysis with two-step DES methods
- Obtain similar results of the empirical analysis with the use of proximity measures
