This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- A new approach for generation of a robust decision making rule is presented.
- The approach combines different MCDM methods and Taguchi's robust design technique.
- The ranks stability with respect to the changes in criteria weights is analyzed.
- A linear regression model of robust decision making rule is introduced.
