This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- An exhaustive list of multi-agent commitment delegation schemes is provided.
- Critical situations are identified that may lead to commitment violation.
- A distributed framework is defined for monitoring and diagnosing such violations.
- The framework is proven sound and complete and is fully implemented.
- The concept is illustrated using an e-commerce delivery case study.
