This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- Interpretability of the feature selection for mixed-type data is increased.
- Any transforming procedure is not needed on categorical and numerical features.
- FSMSD selects features that are not biased by any data-type.
- FSMSD and benchmark methods are compared with 15 mixed-type data.
